

## Efficient purity based on flexibility.

In hospitals, nursing homes, the food processing industry – hygiene is everything. The same holds true for textiles. Their processing must meet strict requirements. Liquid LIQUISAN VARIO® fulfils those requirements. Providing unique flexibility with outstanding cleaning results and hygienic purity.

Independent expert opinions have confirmed its reliable, bactericidal, fungicidal and virucidal effectiveness at 40 and 60 °C. In doing so, LIQUISAN VARIO® meets the strict guidelines established by both VAH (DGHM) and RKI.

## LIQUISAN VARIO® Fewer chemicals, more flexibility and hygienic purity

The new LIQUISAN VARIO® process with two components is the new, flexible way to treat hygiene textiles for assured cleanliness and purity. And it does so with minimal use of chemical, water and energy resources. The two system components LIQUISAN B® and OXYPLEX® plus are optimally designed for the proper, disinfecting processing of hygiene laundry at 40 and 60 °C. Its application can be individually adjusted to the degree of contamination, hygiene requirements and temperature range. Hygiene textiles with different care labels can thereby be washed together and perfectly hygienically in one machine - without having to bother switching detergents and disinfecting agents. The new LIQUISAN VARIO® process can be used in both continue machines and washer extractor machines.

LIQUISAN VARIO® has had its gentle cleaning effectiveness and highest white quality proven in extensive tests. Its ease of use is unrivalled thanks to its flexibility. LIQUISAN VARIO® can be conveniently combined with all other BurnusHychem products in order to satisfy individual requirements.

### The result:

More flexibility, outstanding cleaning performance, minimal use of resources and therefore a highly efficient result.

**burnus** HYCHEM  
Laundry systems for professionals.  
Innovative. Efficient. Sustainable.

## LIQUISAN VARIO®

# More efficient cleaning – more sustainable operations

### Product type

Liquid 2 component system for processing hygiene textiles.

### Areas of application

Textiles from the healthcare field, in particular from hospitals, nursing and retirement homes, textiles from the food industry.

### Temperature ranges

The LIQUISAN VARIO® process with the system components LIQUISAN B® and OXYPLEX® plus is optimally designed for the proper, disinfecting processing of hygiene textiles at 40 and 60 °C.

### Seal of quality

The bactericidal, fungicidal and virucidal effectiveness has been proven by two independent expert opinions in accordance with VAH (DGHM) directives and RKI guideline. The 2-component cleaning system was proven effective in meeting all requirements in 25 and 50 cumulative cleaning treatments.

### Other

The LIQUISAN VARIO® process can be combined with all other products from the BurnusHychem portfolio and can thereby be tailored to meet individual needs.

### Benefits

---

- Greatest flexibility at 40 and 60 °C
- Ensured cleaning, whitening and disinfection
- Minimal energy use
- Maximum textile care
- Conserves resources
