

NANOWELL®

The original

Use NANOWELL® to freshen up your laundry.

The innovative fragrance finish for high-quality towelling items.

With NANOWELL® even the most luxurious towelling becomes still finer. Special care properties give the laundry a pleasant, soft feel – but more than that: with an innovative formula, microfine capsules are preserved in the laundry and don't unfold their fragrance until the items are used. In this way, demanding guests in hotels and spas are treated to a unique fragrance experience*. Towelling items become a pure wellness experience.

*available in the fragrances: mountain fresh, summer wind, and lily of the valley

NANOWELL®

The temperature-stable fragrance component.

Product type

NANOWELL® is a fragrance concentrate in the form of microcapsules. It is intended as a rinse additive.

Temperature range

Especially suitable for drying cycles at high temperatures in commercial laundries.

Textiles

Developed for luxurious towelling items in hotels, health facilities, spas and beauty farms: e.g. hand towels, bath sheets and bath towels, sauna and spa cloths, beach towels and bathrobes, washing mitts, guest and bathroom towels.

Benefits

- Temperature stability thanks to fragrance capsules
- The fragrance is not released until the items are used
- Textiles are soft to the touch
- Anti-static properties
- Ideal even at high drying temperatures
- The "fragrance reservoir" remains intact for years until the laundry item is used
